

➤ Log into a cluster computer:

- Attempt to log in using the intra credentials that were sent to you via email a few days before the start of the piscine.
- You can login ([here](#)).
- You can reset your password ([here](#)).

➤ Explore the campus and Intranet:

- In the intranet, you will find everything you need. Under each project you will find learning videos. You are not obliged to watch them all. Knowledge is everywhere; you just need to learn how to find it. But before you start coding right away, we strongly recommend you to start with e-learning video tutorials.

➤ Connect with your peers:

- Connecting with your peers is a vital aspect of collaborative learning and community building. In the dynamic educational environment, establishing meaningful connections fosters an exchange of ideas, insights, and support. Platforms like Slack play a crucial role in facilitating this interaction. Through Slack, students can engage in real-time communication, share experiences, seek assistance, and celebrate achievements. Whether discussing coursework, collaborating on projects, or simply exchanging friendly banter, connecting with peers enriches the overall learning experience, creating a sense of camaraderie within the academic community.
- **P.S:** Slack is the main communication platform during the piscine. You will receive an email with an invitation to our slack workspace.

➤ Exams and events:

- You are scheduled to have an exam every Friday (with exceptional cases on Thursday or Saturday). It is crucial to subscribe to the exam on both the project page and the event page. Failure to subscribe on both platforms will result in the absence of an exam session on the server, leading to a score of 0 for the exam. Ensure that you subscribe on both pages to participate in the examination and avoid any unintended consequences.
- The Exams cannot be taken remotely, you must be on campus and on time!
- Make sure not to miss out on the events we've specially organized for you. There's a variety of engaging activities, and you're likely to find some that pique your interest. Don't forget to subscribe to these events on the intra platform to stay in the loop and make the most of the opportunities available.

➤ Good luck with your Piscine:

- The piscine offers a one-of-a-kind experience where you not only acquire extensive coding knowledge but also develop invaluable soft skills. Beyond the realm of coding, this journey is an opportunity to meet new people and engage in enjoyable discussions. It's not just about constant coding – it's essential to strike a balance. Remember to take breaks, share some memes, and have fun! Embracing a well-rounded approach ensures a fulfilling and enriching piscine experience.
